---

### CODE

**NOMO FOMO:** nomo-fomo.com

Social travel platform. **Tech Stack:** Rails, jQuery, HTML, CSS, JavaScript

**CENTRO PLATFORM:** Digital media operations software. **Tech Stack:** Rails, Javascript, ReactJS

**HOME AGAIN:** home-again.herokuapp.com

This personal project consumes the Twitter API to aggregate all tweets mentioning lost or found pets in your area. The app utilizes Ajax calls and Skylight for monitoring performance. **Tech Stack:** Rails 4.2, Foundation, RSpec, JavaScript, jQuery.

**MEETUP MATCHER:** meetupmatcher.herokuapp.com

This group project consumes the Twitter and Meetup APIs to recommend Meetup groups for users based on the most commonly used words in their Tweets. I was responsible for integrating and testing the APIs using WebMock and VCR. **Tech Stack:** Rails 4.2, Foundation, RSpec,

---

### EDUCATION

**TURING SCHOOL OF SOFTWARE & DESIGN:** Certificate in Web Application Development with Ruby, Rails and JavaScript (Denver, CO), 2015

**KIRKWOOD COLLEGE:** Associate of Applied Science (Iowa City, IA), 2011

---

### EXPERIENCE

**SOFTWARE ENGINEER:** Nomo FOMO (Remote), 7/2017-Present

Developed features for a social travel planning site in an Agile environment using Ruby on Rails, JavaScript, HTML and CSS with a focus on the back end Rails API. Mentored new developers, performed code reviews and as with most early-stage Startups, wore many hats from Project Management to QA. Collaborated with leadership team to execute ideas along with promoting new ideas, process improvements and technologies.

**ASSOCIATE SOFTWARE ENGINEER:** Centro (Chicago, IL), 9/2015-3/2016

Full stack development of a media buying platform for a leading AdTech company with a focus on implementing UI features using ReactJS. Worked closely with design team to ensure solutions improved client side experience. Also included work on our Rails backend to fix existing bugs and implement new functionality.

**TURING SCHOOL OF SOFTWARE & DESIGN:** Full-time 27 week/1800 hour program. Ruby fundamentals, object-oriented programming, agile methodologies and test-driven development. Focus on Sinatra, Rails, security, APIs and Services, performance and client-side development.
